

# CSC 2019

## Organic Contaminants: Treatment, Fate and Environmental Impact - joint with OR

### Organizers:

Jean-Philippe Bellenger, *Université de Sherbrooke*, Hubert Cabana, *Université de Sherbrooke*, Pedro Segura, *Université de Sherbrooke*

This symposium is dedicated to researches on the presence, effects and dynamics of emerging organic contaminants in the environment including:

- 1- Impact of emerging pollutants on ecosystems (laboratory and field approaches)
- 2- Dynamics and fate of emergent pollutants in the environment (aquatic, marine systems and soils)
- 3- Advance in analytical chemistry related to the study of emerging organic contaminants
- 4- Advance in the treatment of emerging organic contaminants

### Keynote speakers.

Boxall Alistair, Environment and Geography, University of York, UK.

Yargeau Viviane, Department of Chemical Engineering, McGill University, QC, Canada

**Deadline for abstract submission: February 11, 2019**

**Abstract submission and registration:**
